❖ About Me

I'm a third-year Computer Engineering student with a diploma in the same field. I'm interested in machine learning and software development, and I'm looking to grow my skills through real-world projects and internships.

❖ Education:

- **B.E. Computer Engineering.** (2024-Pursuing)
Gujarat Technological University (GTU) | CGPA: 7.22/10 SVIT Vasad
- **Diploma in Computer Engineering.** (2021-2024)
Gujarat Technological University (GTU) | CGPA: 7.56/10 Shree K.J. Polytechnic, Bharuch

❖ Skills:

- **Languages:** Python, Java, PHP, SQL, MySQL, NoSQL, Node.js, Next.js
- **Web:** HTML, CSS, Bootstrap, JavaScript, Flask
- **Tools & Platforms:** Git, GitHub, MongoDB, Google Cloud, PyCharm, Android Studio, Vercel, Godaddy, Firebase
- **Core Areas:** Machine Learning, Full-Stack Development, Android Development, Frontend development

❖ Experience/Internships

- **Technomax Solutions.** (Aug2022-Sept2022)
Website Development Intern
Bholav, Bharuch, Gujarat
 - Developed responsive web applications using HTML, CSS, and Bootstrap.
 - Designed and implemented user authentication modules.
 - Enhanced cross-browser compatibility and mobile responsiveness.
- **Arth Technology.** (July2023-Sept2023)
Android App Development Intern
New VIP Road, Vadodara
 - Developed Android applications with database connectivity and UI components.
 - Built a Task Manager app with secure login and task management features.
 - Worked on application testing, debugging, and performance optimization.
- **Parul chemicals.** (April2026-Current)
Full stack Developer intern.
Alkapuri, Vadodara, Gujarat
 - Rebuilt and deployed the company website using Node.js, Vercel, and GoDaddy.
 - Integrated contact form and email automation for customer inquiries.
 - Developed and implemented email automation across multiple company websites.

❖ PROJECTS & FREELANCE EXPERIENCE

- **Vibgyor Maple (Freelance) | Full-Stack Web Developer**
Canada-based Business
 - Developed and deployed a responsive business website using Node.js, creating 5+ dynamic pages and lead-generation workflows.
 - Optimized performance, accessibility, and mobile responsiveness, achieving 90%+ Lighthouse scores and improving load times by 40%.
 - Managed end-to-end deployment, hosting, and maintenance on Vercel, ensuring reliable production performance
- **Aurbient Technologies (Freelance) | Full-Stack Web Developer**
Indore, India-based Technology Company
 - Built and deployed a corporate website using Node.js, HTML, CSS, and JS, delivering 10+ responsive pages for business operations.
 - Integrated automated email notifications and contact management workflows, streamlining the handling of 100+ client inquiries.
 - Managed deployment, optimization, and maintenance through Vercel, improving website performance and user experience across devices.
- **Disease Prediction System (Machine Learning)**
 - Developed a web-based disease prediction platform using Python, Flask, and Machine Learning, analyzing 5,000+ health records for predictive healthcare insights.
 - Trained and optimized multiple ML models, achieving 85%+ prediction accuracy through data preprocessing, feature engineering, and model tuning.
 - Built a complete full-stack solution with responsive frontend, backend APIs, and real-time prediction capabilities, delivering results in under 2 seconds.
- **Cloudburst Prediction System (Machine Learning)**
 - Led a team of 4 developers in building an ML-based cloudburst prediction system using 10,000+ weather data records.
 - Developed predictive models and data processing pipelines for forecasting extreme weather events and improving analysis efficiency.
 - Designed and implemented an interactive dashboard featuring 5+ visualizations for monitoring and interpreting prediction results.
- **Restaurant Management System (Full Stack)**
 - Developed a full-stack restaurant management system using PHP, MySQL, HTML, CSS, Bootstrap, and JavaScript, streamlining restaurant operations through a centralized platform.
 - Implemented 15+ CRUD modules for menu management, order processing, customer records, inventory tracking, and database administration.
 - Designed a responsive user interface and managed a database of 1,000+ transaction records, reducing manual operational effort by approximately 60%.

❖ Achievements & Hackathons

- Team Leader — GDG Hackathon 2026 (Medical ML Project)
- Team Leader — Mecia Hacks 2024 (Cloudburst ML System)
- Participant — Tinkerthon 3.0 (Canteen Management System)

❖ Certifications

- **SAP** – Certified Backend Developer
- **Microsoft** – Introduction to Generative AI
- **IBM** – Agile & Scrum
- **SAP** – Enterprise Systems
