About Me

I'm a third-year Computer Engineering student with a diploma in the same field. I'm interested in machine learning and software development, and I'm looking to grow my skills through real-world projects and internships.

❖ Education:

- **B.E. Computer Engineering.** SVIT Vasad (2024-Pursuing, CPI: 7.41)
 - **Diploma in Computer Engineering.** Shree K.J. Polytechnic, Bharuch (2021–2024, CPI: 7.56)
-

❖ Skills:

- **Languages:** Python, Java (Basic), PHP, SQL, MySQL, NoSQL
 - **Web:** HTML, CSS, Bootstrap, JavaScript, Flask
 - **Tools & Platforms:** Git, GitHub, MongoDB, Google Cloud, PyCharm, Android Studio
 - **Core Areas:** Machine Learning, Full-Stack Development, Android Development
-

❖ Experience/Internships

- **Website Development Intern — Technomax Solutions (2022)**
 - Designed responsive websites using HTML, CSS, Bootstrap
 - Built login and registration pages
 - **Android App Development Intern — Arth Technology (2023)**
 - Worked on Android UI, API integration, and database handling
 - Developed a task manager app with login system
-

❖ Projects:

- **Disease Prediction System (ML + Flask)**
 - **Tech:** Python, Flask, HTML, CSS, JS, ML Models
 - Built a web app that predicts diseases using medical input data
 - Integrated machine learning models for health analysis
 - Developed full frontend + backend system
 - **Cloudburst Prediction System**
 - **Tech:** Python, ML, Flask, Bootstrap, JS
 - Developed an ML model to predict cloudburst risks using weather datasets
 - Led the team and handled full-stack development
 - Built dashboard interface for prediction results
 - **E-Commerce CRUD Website**
 - **Tech:** Python, MongoDB, HTML, CSS
 - Created an online store with product management (Add/Update/Delete)
 - Implemented backend database operations using MongoDB
 - **Tour Package Android App**
 - **Tech:** Java, XML, Android Studio
 - Built an Android app displaying tour packages with UI navigation
 - Designed user interface and app structure
-

❖ Achievements & Hackathons

- Team Leader — GDG Hackathon 2026 (Medical ML Project)
 - Team Leader — Mecia Hacks 2024 (Cloudburst ML System)
 - Participant — Tinkerthon 3.0 (Canteen Management System)
-

❖ Certifications

- Google Hack2Skill
- Microsoft – Introduction to Generative AI
- IBM – Agile & Scrum
- SAP – Enterprise Systems
